

**Utilities Commission  
City of New Smyrna Beach, Florida**

**Job Title:** Water Reclamation Plant Operator C, B, or A  
**Department:** Water Resources Department  
**Reports To:** Water Reclamation Operations Supervisor  
**Revised:** 12/2010  
**Pay Grade:** (13,15 & 17), Non-Exempt, Union

**Job Summary**

This is highly specialized work in the operations of a Class A Wastewater Reclamation/Reuse Plant. Controls treatment plant machines and equipment to purify and clarify water for reuse and industrial use.

Employee receives oral and written instructions from Plant Supervisor. He/She is responsible for efficient plant operations during his/her assigned shift. This includes all plant equipment and treatment processes and interrelated system components. Work is performed under established procedures, but employee must exercise independent judgment in regulating treatment to meet changing conditions and handling emergencies to continuously meet all regulatory requirements. The Class-A plant is operated 24/7.

Work includes sampling and testing at various points in the treatment process as required for process control; other laboratory analysis necessary for permit requirements~ adjusting chemical feeds; plant operation and maintenance; and other aspects of system operations. Work is appraised by the Supervisor through plant records and visual observations.

**Essential Duties and Responsibilities** include the following. Other duties may be assigned.

Operates and controls electric motors, pumps, and valves to regulate flow of raw wastewater into the treatment plant.

Controls specified amounts of chemicals, such as chlorine, alum, and lime into water or adjust an automatic device that admits specified amounts of chemicals into tanks to disinfect, deodorize or clarify water.

Starts agitators to mix chemicals and allows impurities to settle to bottom of tank. Adjust valves to regulate water through filter beds to remove impurities. Pumps reuse water into reuse system and ponds.

Monitors SCADA system and adjusts controls to regulate flow rates, return rates, pond levels, and system pressure.

Cleans tanks and filters.

Repairs and lubricates machines and equipment, using hand tools and power tools. Tests water samples to determine chlorine, turbidity and P.H.

Records data, such as chlorine residual, turbidity, P.H. and water pressure.

**Competencies**

*To perform the job successfully, an individual should demonstrate the following competencies:*

**Problem Solving** - Identifies and resolves problems in a timely manner; Gathers and analyzes information skillfully; Develops alternative solutions.

**Project Management** - Communicates changes and progress;
