

Brighten the Holidays

with Electrical Safety

Extension cords help brighten the winter holidays by making sure your twinkling lights reach enough outlets. But it's your job to make sure they reach those outlets safely.

Some safety tips from your public power utility:

- Use extension cords for short-term jobs around the holidays, but pack them away when you take down the tree. They're not intended for everyday use.
- Do not plug extension cords together. Choose one long cord instead.
- Unplug the cord when it's not in use, as an extension cord remains energized until it is unplugged from the wall.
- Never run extension cords under a rug or across a wet floor.
- Outdoor uses require cords rated for the outdoors. It's not safe to use indoor cords outside.
- Replace extension cords that are damaged, cut or feel hot to the touch.

Happy Holidays

10 tips for making your Christmas tree fire-safe

- 1. When decorating your tree, always use lights listed by a testing laboratory. Some lights are designed only for indoor or outdoor use, but not both. Larger tree lights should also have some type of reflector rather than a bare bulb.**
- 2. Follow the manufacturer's instructions on how to use tree lights. Any string of lights with worn, frayed or broken cords or loose bulb connections should not be used. Connect no more than three strands of push-in bulbs and a maximum of 50 bulbs for screw-in bulbs.**
- 3. Always unplug Christmas tree lights before leaving home or going to bed.**
- 4. Bring outdoor electrical lights inside after the holidays to prevent hazards and extend their life.**
- 5. Never use lit candles to decorate a tree, and make sure any lit candles in the room are placed well away from tree branches.**
- 6. Try to keep live trees as moist as possible by giving them plenty of water daily. Do not purchase a tree that is dry or dropping needles. Check for fresh, green needles. And place your tree in a sturdy tree stand designed not to tip over.**
- 7. If you purchase an artificial tree, be sure it is labeled as fire-retardant.**
- 8. Children are fascinated with Christmas trees. Keep a watchful eye on them when around the tree and do not let them play with the wiring or lights. Store matches and lighters up high, out of reach, preferably in a locked cabinet.**
- 9. Make sure the tree is at least three feet (one meter) away from any heat source, such as fireplaces and radiators. Try to position the tree near an outlet so that cords are not running long distances. Do not place the tree where it may block exits.**
- 10. Safely dispose of the tree when it begins dropping needles. Dried-out trees are highly flammable and should not be left in a house or garage, or placed against the house.**
